Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 December 2006.

Prosecution Reopened

1. In view of the Appeal Brief filed on 12/11/06, PROSECUTION IS HEREBY REOPENED. A non-final rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3-12 and 14-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knorr et al (US 2002/0077929 A1 in view of Robertson (US 6,609,106 B1).

Applicant in the IDS received on 2/15/05 cited Robertson.

Knorr discloses an electronic catalog system (online catalog), comprising: an electronic catalog (online catalog) of items that are available for purchase, that include descriptions of the items, and electronic catalog including pages providing functionality for online users to select items to purchase (see abstract); a wish list application that provides functionality for users of the electronic catalog to create wish lists with items selected from the electronic catalog, and to purchase items as gifts from the wish lists of other users (page 1, [0006]); a database 210 which stores information about affiliations between the users (fig. 4). Knorr does not explicitly disclose determining whether the first item is on an electronic wish list of a user who is affiliated with the first user, and (b) when the first item is determined to be on an electronic wish list of a second user who is affiliated with the first user. Robertson discloses a system that is capable of determining whether the first item is on an electronic wish list of a user who is affiliated with the first user, and (b) when the first item is determined to be on an electronic wish list of a second user who is affiliated with the first user by searching the profile store in the central database (see fig. 1, 64), a notification component which is responsive, to an online request from a first user

Art Unit: 3714

for a catalog page which includes a description of a first item, and whereby users are notified, during browsing of the electronic catalog, when accessed items are on the electronic wish lists of other users (see abstract, fig. 1, 78). Robertson further discloses a central data processor system for storing and indexing electronic catalog data, including graphic and audio message data (col. 3, lines 14-67).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the electronic wish list system and the notification unit as taught by Robertson into the system of Knorr because it would provide a system that allows buyers to easily shop for others by searching for a user's wish list and personal preferences at the system Web and also allow the user to select one or more buyers from an address book and notify the selected buyers of a specific wish list.

Allowable Subject Matter

4. Claims 2, 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the references, either singularly or in combination, discloses or even suggests:

As per claim 2, a system further comprising a cache memory which stores wish lists of users affiliated with the first user while the first user browses the electronic catalog, wherein the notification component accesses the cache memory to determine whether items viewed by the first user are on the wish lists of users affiliated with the first user.

Art Unit: 3714

As per claim 13, a method wherein monitoring browsing of the electronic catalog by the first user comprises maintaining wish lists of at least some of the affiliated users in a cache memory, and using the cache memory to determine whether items accessed by the first user are on electronic wish lists of the affiliated users.

Response to Arguments

5. Applicant's arguments with respect to claims 1-35 have been considered but are moot in view of the new ground(s) of rejection.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald Laneau whose telephone number is (571) 272-6784. The examiner can normally be reached on 7:30 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pezzuto can be reached on (571) 272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
